BROKO REALTY LIMITED

Full Brokerage Automation Overview

Roles · Layers · Automations · Compliance

Pankaj Arora, CEO & Broker of Record | 2026 | Confidential

This is a briefing document. Each section is short and focused. Read through it, understand the picture, and come prepared to discuss.

The Big Picture

We are building an automated brokerage. Every repetitive task gets an automation. Every person gets tools that make them faster. Humans focus on relationships and judgment. AI handles everything else.

- **Broko Realty Limited is the brokerage — our first client and proof of concept**
- **Broko Technology Limited is building all the tools and automations that power it**
- **Everything proven at Broko Realty becomes the SaaS product sold to other brokerages**

Four layers run the brokerage:

- Layer 1 — Front Office: leads, CRM, communication, nurturing
- Layer 2 — Middle Office: CMA, listings, offers, transactions
- Layer 3 — Back Office: accounting, trust, compliance, documents
- Layer 4 — Validation: runs across everything — checks every input and output

Section 1 — People and Roles

Everyone in the brokerage has a defined role, a layer they operate in, and specific responsibilities.

Broker of Record

All layers — strategic oversight and ultimate accountability

- Final decision maker on all compliance, agent, and business matters
- Signs all RECO filings, trust account attestations, and regulatory documents
- Reviews performance across all layers — marketing, deals, and finance weekly
- Automation delivers a weekly performance brief and compliance alerts automatically — no manual data gathering
- Signs the mandatory annual RECO financial filing — effective October 2026

Realtors / Real Estate Agents

Layer 1 (Front Office) and Layer 2 (Middle Office)

- Generate and manage leads, conduct showings, and maintain client relationships
- Prepare and negotiate offers — resale, rental, pre-construction, and assignment
- Manage transactions from accepted offer through to closing
- CMA reports, offer forms, follow-up sequences, and marketing materials all automated — agents focus on the client conversation
- AI co-pilot answers compliance and procedure questions 24/7

Team Lead

Layer 1 and Layer 2 — agent performance and deal oversight

- Oversees agent pipeline, deal activity, and lead distribution
- Coaches agents on performance and handles escalations
- Leads all agent recruitment conversations
- Lead distribution, agent activity dashboard, inactivity alerts, and hiring outreach all automated

Office Admin

All layers — the connective tissue of the brokerage

- Manages agent onboarding, deal administration, and RECO compliance records
- Maintains brokerage policies, procedures, and SOP documentation
- Handles exceptions — anything the automation cannot process
- Agent onboarding, document storage, RECO registration tracking, E&O expiry, and CE deadlines all automated

Deal Administrator

Layer 2 and Layer 3 — transaction execution and documentation

- Manages all documentation for each active deal
- Coordinates condition deadlines between agent, client, lawyer, and mortgage broker
- Ensures FINTRAC ID verification completed for every transaction
- Deal tracker, condition deadline alerts, document collection reminders, and deal file completeness all automated

Accounting

Layer 3 — financial management and reporting

- Manages brokerage operating and trust accounts separately — never mixed
- Calculates agent commissions, tracks receivables, payables, and referral fees

- Prepares monthly reconciliation and submits annual RECO financial filing
- Commission calculations, trust reconciliation, RECO filing data, EFT receipts, and agent financial summaries all automated

---

Reception / Front Office

Layer 1 — first point of contact

- First point of contact for inbound calls, walk-ins, and general inquiries
- Routes inquiries to the right agent or department
- AI engagement automation handles website and after-hours inquiries 24/7 — reception handles complex situations only

---

Marketing

All layers — brand, visibility, leads, and content

- Owns all marketing — brand, SEO, paid ads, social media, content, and lead generation
- Manages the SEO agency (Brandlume) and social media execution
- Human-first content approach — AI assists with drafts and captions, humans approve everything
- Content calendar, SEO reports, ad performance data, social captions, and lead capture all automated

Section 2 — Layer 1: Front Office

Everything from a lead arriving to a client becoming an active buyer or seller.

1.1 — Lead Generation

- Leads come in from Google, Meta, broko.ai, organic search, and referrals
- Every lead captured in CRM within 60 seconds — no manual entry ever
- CASL consent recorded at point of capture — legally required
- Duplicate leads merged automatically — one record per person regardless of source

1.2 — CRM and Lead Management

- Every lead scored 0-100 by AI based on behaviour — pages visited, time on site, Bestimate use, return visits
- Hot (70+), Warm (40-69), Cold (below 40) — classified and routed to right agent automatically
- Lead scoring model retrains every Sunday based on real conversion outcomes
- CRM dashboards show each role only what they need — role-based access enforced

1.3 — Client Communication and Nurturing

- Every lead gets a personalised follow-up sequence — WhatsApp, email, SMS triggered by behaviour
- Hot leads get an AI voice call within 60 seconds of capture — qualifies and books agent callback
- All communication CASL compliant — unsubscribe option on every message
- Message sequences A/B tested automatically — best performing version deployed

1.4 — Post-Close Nurturing Loop

- After deal closes, client enters long-term nurturing — stays in touch for referrals and repeat business
- Google review request, anniversary messages, and market updates sent automatically
- Referral tracking — when past client refers a new lead, both are linked in CRM

Section 3 — Layer 2: Middle Office

Everything from listing or offer preparation through to transaction closing.

2.1 — CMA and Property Valuation

- AI generates CMA report in under 10 seconds — three pillars: hard value, soft features, market analysis
- Branded PDF report produced automatically — agent reviews and shares with client
- Agent rates every CMA thumbs up or down — model retrains every Sunday automatically
- Bestimate on broko.ai gives consumers instant valuation — drives leads and platform trust

2.2 — Listing Management

- Listing synced to MLS automatically — PropTx and Cornerstone boards
- AI writes SEO-optimised listing description from property details — agent approves
- Social posts, flyers, and email campaign generated automatically from listing data
- Price changes, status updates, and expiries tracked and actioned automatically

2.3 — Offer Preparation and Negotiation

- OREA forms auto-filled from CRM deal data — agent reviews price, conditions, and dates only
- Compliance check runs on every offer before submission — PASS or FAIL with issue list
- Different workflows for different deal types:
  - Resale — OREA Agreement of Purchase and Sale
  - Rental — OREA Residential Tenancy Agreement
  - Pre-construction — builder contract, deposit schedule, occupancy terms
  - Assignment — assignment agreement, original APS, builder consent tracked
- All offer versions and counter offers saved automatically — full negotiation history in deal file

2.4 — Representation Agreements and FINTRAC

- Buyer and seller representation agreements generated and sent for e-signing before any offer work begins
- FINTRAC identity verification triggered automatically at representation stage — required by law
- FINTRAC documents stored encrypted per deal — producible on demand
- Referral agreements auto-generated when referral source recorded in CRM

2.5 — Transaction Management — Offer to Close

- Every deal tracked from accepted offer to closing — each stage has checklist, responsible party, and deadline
- Condition deadline alerts escalate automatically — 72hr, 48hr, 24hr, 4hr to all parties
- Lawyer introduction and deal summary sent automatically when conditions firm
- Commission release triggered on closing — feeds into accounting automatically

Section 4 — Layer 3: Back Office

Accounting, trust management, compliance, documentation, and everything that keeps the brokerage legally and financially sound.

3.1 — Accounting and Commission Management

- Commission calculated automatically when deal closes — agent split, brokerage share, referral fees
- Receivables, payables, and EFT payments tracked and processed automatically
- Agent financial summary available in portal — GCI, splits, deductions, year-to-date
- Monthly P&L and financial reports auto-generated — CEO sees burn rate vs budget weekly

3.2 — Trust Account Management

- Client deposits held in a separate trust account — never mixed with operating funds — TRESA requirement
- Every deposit recorded automatically — amount, source, deal reference, date received
- Monthly trust reconciliation prepared automatically — Broker of Record reviews and attests
- Annual RECO financial filing data auto-compiled — mandatory submission from October 1 2026
- Unclaimed trust monies flagged automatically when deal shows no activity for defined period

3.3 — Documentation, Signing, and Storage

- All transaction documents signed electronically via DocuSign — routed to correct parties automatically
- Signed documents stored encrypted on AWS — organised by deal, accessible to authorised roles only
- Document retention enforced automatically — RECO minimum retention periods built in
- Deal file completeness tracked in real time — missing items flagged before key milestones

3.4 — Agent Compliance Tracking

- RECO registration expiry tracked per agent — automated alert at 90 days before lapse
- E&O insurance expiry tracked — automated alert at 60 days before lapse
- Agent continuing education deadlines monitored — alerts at 60 and 30 days before due
- All compliance records stored and producible on demand for RECO audit or inspection

Section 5 — Layer 4: Validation and Compliance

Runs across everything. Every input is checked. Every AI output is validated. No wrong or hallucinated information reaches a client or agent. Humans are the final gate.

5.1 — AI Output Validation

- Every AI-generated output gets a confidence score 0-100 before delivery
- Below 70 — flagged for human review, not delivered until approved
- Hallucination detection runs on all AI outputs — especially compliance and legal content
- All validation results logged with timestamp — full audit trail of every AI output

5.2 — RECO and Offer Compliance Checks

- Every offer checked against RECO rules before submission — PASS or FAIL with issue list
- Every listing advertisement checked against RECO advertising guidelines
- Multiple representation situations flagged automatically — same agent or brokerage on both sides of a deal
- Compliance check log stored with every deal file — producible if RECO requests documentation

5.3 — Input Validation

- Client information validated at entry — contact details, address format, ID documents
- Financial figures validated — deposit amounts, commission percentages, price fields
- Offer terms validated — closing dates logical, condition periods within acceptable range
- FINTRAC document quality checked — ID legible, not expired, matches client record

Section 6 — Compliance Laws and Regulations

Every law and regulation that affects Broko Realty, our agents, our clients, and our transactions. All of these are built into the automation and validation layer.

Federal Laws

- **FINTRAC — Financial Transactions and Reports Analysis Centre of Canada**
  - Anti-money laundering and anti-terrorist financing obligations for all real estate transactions
  - Client identification required — two pieces of ID, verified before any transaction proceeds
  - Suspicious transaction reporting obligations — must report if transaction appears unusual
  - Record keeping — FINTRAC records must be kept for 5 years minimum
- **PIPEDA — Personal Information Protection and Electronic Documents Act**
  - Governs how we collect, use, and store personal information of clients and agents
  - Privacy policy must disclose AI processing and automated decision-making
  - Data subject requests — clients can request access to or deletion of their data
  - Data breach protocol required — must notify OPCC and affected individuals
- **Bill C-27 — Proposed PIPEDA Modernisation (monitor)**
  - Proposes new AI transparency requirements — clients must be told when AI is making decisions about them
  - Not yet law — being monitored, build-ready to comply when passed
- **CASL — Canada Anti-Spam Legislation**
  - Express consent required before sending any commercial electronic message
  - Every marketing email, WhatsApp, and SMS must include unsubscribe option
  - Consent records must be stored and producible on demand — fine up to $10M for violation
  - Implied consent limited — expires after 2 years unless renewed
- **Income Tax Act — Real Estate Transaction Implications**
  - Assignment transactions have specific tax reporting requirements
  - HST may apply on certain new construction and assignment transactions
  - Principal residence exemption documentation — agents must advise clients to consult their accountant

---

Ontario Provincial Laws

- **TRESA — Trust in Real Estate Services Act 2002 (replaced REBBA)**
  - Governs all real estate trading in Ontario — the primary law for our brokerage
  - Representation obligations — written representation agreements required before trading
  - Trust account rules — deposits must be held in trust, separate from operating funds
  - Disclosure obligations — conflicts of interest, multiple representation, referral fees
  - Advertising rules — must not be misleading, must include brokerage name
- **RECO — Real Estate Council of Ontario**
  - Regulator — administers TRESA and can inspect, investigate, and discipline brokerages
  - Annual financial filing — mandatory from October 1 2026 through RECO MyWeb portal
  - Agent registration — all agents must be registered with RECO and registration must be current
  - Continuing education — agents must complete CE requirements every two years
  - E&O insurance — mandatory for all registered agents
- **OREA — Ontario Real Estate Association Forms**
  - Standard form agreements used for all Ontario transactions — Agreement of Purchase and Sale, Listing Agreements, Buyer Representation Agreements, Residential Tenancy Agreements
  - Forms updated periodically — system must detect and adopt new versions automatically
- **Land Transfer Tax Act**
  - LTT applies on all Ontario real estate purchases — first-time buyer rebates available
  - Toronto also has a Municipal Land Transfer Tax — applies on top of provincial LTT
  - Agents must ensure clients are aware and have their lawyer confirm amounts
- **Consumer Protection Act**

  - Governs consumer transactions including cancellation rights on certain agreements
  - Internet agreements have specific disclosure requirements
- **Ontario Human Rights Code**
  - Prohibits discrimination in housing — cannot refuse to show properties based on protected grounds
  - Advertising must not discriminate — no exclusionary language in listings
- **AODA — Accessibility for Ontarians with Disabilities Act**
  - broko.ai must meet WCAG 2.1 Level AA accessibility standards — legal requirement
  - Complaints process must be published and accessible

MLS and Data Rules

- **PropTx VOW Rules (formerly TREB)**
  - VOW — Virtual Office Website — specific rules for displaying MLS data online
  - Terms of Use gate required before any MLS or sold data is displayed to consumers
  - Sold data must be behind registration — unregistered users cannot see sold prices
  - Data cannot be shared with any external AI API — must stay within our AWS environment
  - Data licence must be current — termination would take down broko.ai entirely
- **Cornerstone Board Rules**
  - Similar VOW and data display rules apply for Cornerstone board listings
  - Listing syndication rules — where data can and cannot be displayed
- **CREA — Canadian Real Estate Association**
  - National rules for MLS data use and display — apply on top of board-level rules
  - REALTOR trademark — only registered members can use the REALTOR designation

---

Privacy and Data Security

- **PIPEDA data boundary — all sensitive MLS and VOW data stays within our AWS environment**
- **Claude API is used only for non-sensitive tasks — report writing, compliance Q&A, content — never for raw MLS data**
- **AWS encryption — all client data stored with AES-256 encryption at rest**
- **Data retention — specific minimum retention periods per document type under TRESA and PIPEDA**
- **Breach protocol — documented process for notifying OPCC and affected individuals within required timeframe**

Section 7 — Standalone Modules

These modules support the brokerage and each gets its own automation and process.

7.1 — Agent Recruitment

- Targeted outreach to licensed Ontario agents — LinkedIn, Meta, referrals
- Core message: join Broko, AI handles the paperwork, you just sell
- The CMA tool and AI platform is the primary recruitment hook
- Recruitment automation sends personalised outreach to 100+ prospects simultaneously

7.2 — Agent Onboarding

- From signed agreement to fully active — target under 2 hours
- RECO verification, E&O collection, portal access, training assignment — all automated in sequence
- Agent marketing kit auto-generated — branded templates, flyers, email signature
- E&O and RECO expiry dates set in tracking system automatically at onboarding

7.3 — Agent Training and Support

- AI training assistant answers any agent question 24/7 — cites source every time
- RECO Act, OREA forms, and brokerage SOPs all loaded as searchable knowledge
- Training is practical and human-first — real scenarios, not just policy text
- Unanswered questions logged — added to knowledge base when answered

7.4 — Showing Management

- BrokerBay API integration to be investigated — if available, showing management automated
- If BrokerBay API not available — internal showing request, confirmation, and feedback workflow built
- Post-showing feedback request sent to buyer agent automatically 1 hour after showing time

7.5 — Marketing Module

- Brand, SEO, paid ads, social media, content, and lead generation — all owned by Marketing
- SEO agency manages execution for now — in-house capability being built over 6 months
- Human-first content — AI assists with drafts and captions, humans approve everything
- All leads from marketing captured in CRM automatically — zero manual entry

What Happens Next

This document is the starting point. Each section becomes a dedicated team discussion. We go through it, capture current status and gaps, and build the development plan from there.

- Each person reads their relevant sections and comes prepared
- We discuss layer by layer — front office first, then middle, back, and validation
- Blockers and gaps become the first sprint priorities
- Notion backlog updated after each discussion — tickets, owners, priorities

"Agents only sell. AI handles everything else."
